# MANUFACTURING IN AUSTRALIA SINCE 1961

## BATA'S REACH IS WORLDWIDE; ITS PRESENCE IS LOCAL

The company that evolved into the Bata Shoe organization was first registered in the town of Zlín Czechoslovakia in 1894. From humble beginnings the small family business expanded rapidly under the vision and guidance of founder Thomas Bata. Thomas was a ninth generation shoemaker determined to become a manufacturer who could provide customers with value for their money.

Bata became an international business in the first half of the 20th century and by the second half of the century had established a true global footprint (production in Australia had commenced in 1961). A progressive and market leading pioneer of the modern footwear industry Bata is now an iconic brand, recognized around the world and serving one million customers in over 60 countries every day.

## BATA INDUSTRIALS IN AUSTRALIA

Bata Shoe Company of Australia Pty Ltd was established in Australia 1961. Production commenced in Mornington Australia in 1981, and remains our Head Office location today.

The Australian company is registered as a quality endorsed company complying with ISO 9001 and AS/NZS 2210.3 and is proud to be part of the world wide organization. With a strong industrial focus, the company manufactures and wholesales over a million pairs of footwear each year through its industrial and wholesale retail business streams.

A working relationship between the Bata Australian and European industrial companies was the platform for the development of an association between the specialized industrial companies within the organization. In 2004 the first meeting of the Bata Industrials World Wide Group was held at Bata Best in the Netherlands. Involving companies from South America, South Africa, Europe, Australia and New Zealand, the enormous potential for the group to synergize information, product development, manufacturing, and sourcing became apparent. The combined technical and R&D resources of the group have lead to a cross pollination of ideas and the capacity for production development has never been stronger. This is epitomized by the development and re-structuring of the Bata Industrials ranges in Australia between 2005 and 2007.

## TESTIMONIALS

### VIVA ENERGY AUSTRALIA

Formerly The Shell Company of Australia Limited

Ian Bell - HSSE Lead - Clyde Project

"Your product meets our requirements and we have specified it in the PPE options as the only boots that we will supply".

### CENTRAL PETROLEUM LIMITED

Alan - HSSE Coordinator

"We were so impressed by the comfort, coolness and ease of putting on and off, not to mention not having to remove the boots going through the airport so we decided to keep them on and return home in them - declaring them the best he had worn".

### DOWNER GROUP

Darryl - Logistics & Procurement Coordinator

"We have been wearing the Helix range for the past six months and we are extremely impressed by the comfort and the fact they can endure the tough North West Australian conditions. The Helix range is more cost effective for us and still provides premium quality, this is our preferred range".

**⚠️ WARNING**

**Risk of Fall**

On Entry & Exit:

- Maintain 3 points of contact
- Never swing off anything
- Never reach for anything above shoulders
- Watch the floor at all times

## BATA'S REACH IS WORLDWIDE; ITS PRESENCE IS LOCAL.

Bata Industrials was founded in the 1970's in response to a specific demand from the market for footwear for professionals. Since then, Bata Industrials has evolved to become a designer, producer and marketer of safety footwear and socks, exclusively targeting the professional end user markets.

Bata's reach worldwide; its presence is local. Our novel international manufacturing structure allows Bata facilities around the globe to respond to the unique needs and wants of local customers. As a result, Bata is honored to be a local company in every country it serves. Bata continues to be guided by the same core principle it has followed for over one hundred years; to know its customers and to create the best possible products to meet their needs.

**HOW CAN WE HELP YOUR BUSINESS?**  
DIRECT DISTRIBUTION ANYWHERE.

Today, Bata Industrials is one of the world's largest manufacturers of this type of footwear, and the only one that is truly a global player. With offices in the Netherlands, Chile, Mexico, South Africa, Kenya, India, China, Singapore, Australia and New Zealand. Bata Industrials serves customer markets on virtually every continent.

FEATURING  
D30<sup>®</sup> IMPACT  
PROTECTION

# ALL NEW HELIX RANGE ENGINEERED FOR COMFORT

Bata Industrial's new premium range of Helix safety work boots are the next step in style and comfort innovation, featuring an advanced cushioning system developed for the modern worker who is on their feet all day everyday.

The Helix range consists of 3 hard working styles that deliver multiple features and a new measure of comfort. The cushioning system is a construction of TPU & PU, made of the right composition/compound and hardness/softness to achieve the best possible shock absorption. The range also features D30® impact protection built into the heel. D30® is a patented technology used to create a soft and flexible shock absorbing material featuring unique molecular properties. In standard conditions it's molecules flow freely, but on impact, they lock together to absorb impact energy and reduce the force transmitted.

With this combination the Helix footwear range achieves the best possible suspension to maximise the reduction of fatigue and stress on the feet and joints. They are lightweight, durable, stylish and provide the highest standard of comfort in the toughest of working conditions.

#### Durable YKK Zip

Allows you to quickly slip in and out of your boots without having to stop and use the laces.

#### D30® Decell Heel Insert

For enhanced comfort & impact absorption to help soften the weight of working on your feet all day.

#### Bellows Tongue

Prevents dirt and debris from entering the boot and also makes the boot watertight.

#### Reflective Strips

For high visibility in low light working conditions.

## TOUGH OFFROADER...

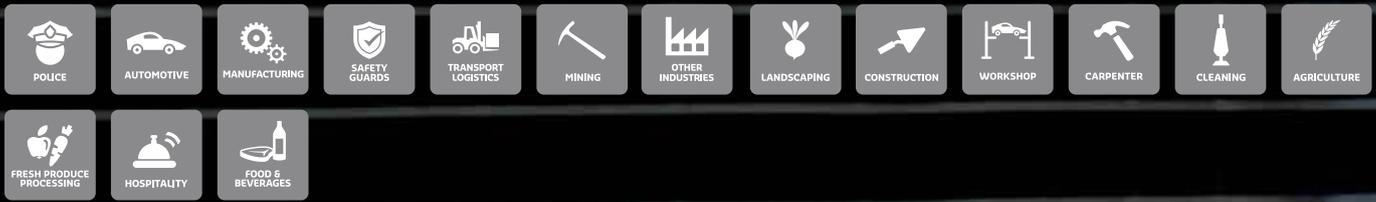

Horizon SC Wheat 805 11514

The Horizon is like a 4WD for your feet. With its bold design and stylish clean lines, the Horizon demands attention and is tough enough to take on any jobsite.

It's impressive off-road performance is accompanied with all the features you need for any job. Built with premium leather upper, a broad fitting and advanced cushioning underfoot, this zip sided boot was made to make the roughest of conditions feel ultra comfortable.

So enjoy a boot that's as tough as its surroundings and engineered to provide greater stability, performance and shock absorbing comfort.

# HELIX

**Premium leather upper** .....

With double seam stitching for a stylish, breathable and comfortable fit.

**Padded collar & tongue** .....

Ensures a comfortable fit.

**Toe cap liner** .....

Protective strip for added comfort around toe area.

**Steel safety toe cap** .....

Designed to meet Australian and New Zealand Safety Standard AS/NZS2210.3 and capable of resisting a drop force of 200 Joules to offer premium protection for your toes.

**External toe scuff cap** .....

TPU toe guard for added protection and durability from wear & tear.

**Comfort footbed** .....

For increased cushioning performance.

**D30® decell heel cushion insert** .....

Receives a wave of initial impact and displaces the shockwaves and channels the energy to encourage movement.

**Cushioned PU midsole** .....

For maximum comfort & cushioning.

**Lightweight TPU outsole** .....

Durable & abrasion resistant.

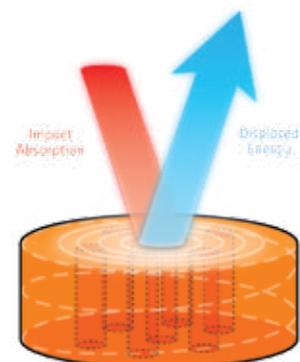

High impact shock protection  
The new Helix range features D30® impact protection built into the heel.

**D30® Impact Protection Decell Heel Cushion Insert**

D30® is a patented technology used to create a soft and flexible shock absorbing material featuring unique molecular properties.

In standard conditions it's molecules flow freely, but on impact, they lock together to absorb impact energy and return the force transmitted reducing fatigue and stress on the feet and joints.

### 30 DAY COMFORT GUARANTEE

Purchase any pair of **Bata Industrial** boots from the **Helix** or **Bickz** range and if you're not completely satisfied with the comfort, simply return the boots to the place of purchase within 30 days of the date of purchase for an exchange or refund.

To make a claim under this guarantee, you must return the purchased footwear at your own cost to the place of purchase. Along with your original receipt within 30 days from the date of purchase. Provided the footwear is not damaged or misused you may choose between a full refund or an exchange up to the original purchase price of the footwear as set out on the purchase receipt.

# JOBMATE SAFETY BOOT

## TOUGH, DURABLE & RELIABLE

Bata Industrial's Jobmate safety boot features a lightweight polyurethane sole for maximum comfort and durability. It's heat resistant to 130°C and also slip, oil and acid resistant. The added combination of a polyurethane cushioned mid sole and molded footbed make it an ultra comfortable boot you can wear all day, no matter what the conditions.

It's heavy duty woven pull tabs and strong elasticated gussets ensure that once on, these boots stay firmly in place. A durable cleated sole provides additional traction underfoot, whilst the reinforced steel toe helps minimise any risk of injury. Designed to be worn comfortably for long periods of time, these boots are a suitable choice for engineering, resources, construction, mining, power utilities, emergency services and general industries.

# AUSTRALIAN MADE PVC GUMBOOTS

## EMPLOYING AUSTRALIAN WORKERS

Based on Victoria's Mornington Peninsula

Bata Australia produces Australian made boots, employing local staff, keeping jobs in Australia.

**Chris Marion** Key Account Manager

I have now been at Bata Australia for 26 years in many various roles. I began in the factory as a machine operator making gumboots in 1988, working on leather shoe making lines, Sales Representative roles and I am currently the Key Account Manager for national and international customers. I've enjoyed being constantly challenged by doing many different jobs along the way and also with the support of Bata completed various training courses. The company is a great team of people with a friendly family atmosphere and I look forward to the future with them.

**Brian Anderson** Operations Manager

Starting with Bata in 1979 as a machine operator the company has given me many opportunities throughout my career, they have provided me with great training from the start. Being able to work for a company that still manufactures in Australia is great for our community. Over the 35 years I have been here I have seen many of people employed by the company at various stages through their careers.

# FOOD PROCESSING FOOTWEAR SAFETY & HYGIENE SOLUTIONS

Bata Industrials introduces a new generation of footwear specifically designed for the Food Processing Industry. The Safemate and Hercules boots were developed and manufactured with the utmost care in accordance to the latest health & safety requirements.

The shape, material and profile of each boot is specifically designed with an eye towards usability and functionality in a food processing plant. Our boots are maintenance-friendly, easy to clean, resistant to animal and plant oils, fats, blood and acids. Each boot is fitted with a safety steel toe cap to provide extra protection from any potential safety hazards.

Comfort is also important for good productivity so our entire new range has a wide comfortable fit, they are easy to slip on and off and are also exceptionally light and flexible. They are extremely soft under foot to prevent tiredness and fatigue of the feet and joints after long hours of work. The outsole is also specifically designed for superior liquid dispersion for maximum slip resistance on indoor surfaces with a self cleaning tread pattern.

## WHITE SLIP ON SAFETY BOOT

The Hercules white elastic sided boot is the newest addition to Bata Industrial's safety footwear range suitable for the food industry. Its water-resistant upper easily wipes clean, breathable lining keeps your feet dry and comfortable and it has excellent slip resistance underfoot. A Dual density polyurethane sole resists oils, fats, acids and grease.

- > PU comfort insole
- > AS / NZS 2210.3 certified
- > Ladies sizing available

## ELIMINATE CROSS CONTAMINATION SAFEMATE PVC GUMBOOTS

Many studies have demonstrated that surfaces in food manufacturing facilities, especially floor areas, can harbor and transmit bacteria and increase the risk of cross contamination. Footwear may also act as a vehicle for the transfer of pathogens within these production areas.

So to reduce or eliminate the introduction of pathogens into food manufacturing areas from soiled footwear Bata Industrials has created the colour coded Safemate Gumboot range.

Available in four assorted colours its perfect for food processing facilities in the meat, poultry, dairy and various other food processing industries.

### COLOUR CODING

Color coded gumboots can help maintain hygienic standards and mitigate cross-contamination throughout a food processing facility by creating a clear distinction between designated areas.

### MULTI DIRECTIONAL SLIP RESISTANCE

Specifically designed outsoles offer slip resistance by channeling water, oil, and other slippery substances away from the outsole tread pattern to create superior grip.

### ACID, OIL & BLOOD RESISTANT

An industrial sole that is highly resistant to various animal and plant oils, fats, blood and acids.

### MAINTENANCE FRIENDLY

The smooth PVC surface ensures that boots are easy to clean and the risk of contamination can be brought to a minimum, making Safemate a very hygienic gumboot.

### TOE PROTECTION

All safemate gumboots feature a hardened Steel Type 1 Toecap designed to meet Australian and New Zealand Safety Standard AS/NZS2210.3 and is capable of resisting a drop force of 200 joules to offer premium protection for your toes.

# FOOD PROCESSING

Working in the food industry often means working long hours on hard and slippery surfaces. So to provide comfort and protection from potential hazards Bata Industrials range of food processing safety footwear is a great fit for the job.

The Safemate gumboot is not only comfortable but durable and hygienic. Its made from an easy to clean PVC that is oil, blood, fat and acid resistant. Safemate also offers a number of protective solutions with its slip resistant sole design and steel toe cap. Safemate gumboots are also color coded to help maintain hygienic standards and prevent cross-contamination throughout a food processing facility.

The new White Hercules slip-on safety boot was designed to meet the requirements of the food industry. The microfibre upper protects against invisible threats like bacteria, debris, organic and chemical residues. They can be easily washed thanks to the clean and simple design. It's the ideal footwear for the Food Industry, Painters and any other industry that requires lightweight footwear with all the safety features of a regular work boot.

# PVC GUMBOOTS

Bata gumboots are proudly manufactured in our Mornington, Victoria factory and have been worn by Australians for decades. Whether for general use in the yard or garden or simply when it's wet and wild outside, Bata gumboots will keep you dry, safe and comfortable.

Bata Utility gumboots are synonymous with Australian industry and are widely used across a variety of applications. The Utility design is a favourite in the workplace. It is reinforced at the heel, ankle and shin and is both durable and flexible. Channelling in the sole allows for improved liquid dispersal and slip resistance.

Our Jobmaster II gumboots are used widely throughout food processing and associated industries. With a specification well suited to fisheries, meat and poultry processing. Jobmaster II gumboots are made from PVC that has been specifically formulated for the correct work application. Fully lined with reinforced uppers and a slip resistant sole design Jobmaster II gumboots provide great comfort for the longest of shifts.

With a revolutionary new sole design that is durable and oil & acid resistant Jobmaster III provides surety under foot and excellent multi directional slip resistance. Comfortable for the longest shifts, Jobmaster III is destined to become a firm favourite across Australian industry, just like its hard working and hard wearing predecessors.

### 6 MONTH MANUFACTURER WARRANTY

**Bata Industrial's** safety footwear is backed by our 6 month manufacturers warranty guarantee. The entire range is warrantied for six (6) months from the date of purchase against defective workmanship and/or materials when used under normal conditions for the purpose intended for the particular boot.

The warranty will become void by the discretion of Bata Industrials if the product has been misused or subjected to excessive wear and tear including exposure to chemicals, cement, lime or heat if the footwear has not been designed for these environments.

To claim the purchaser must return the footwear and provide proof of purchase to the place of purchase. The footwear will then be returned to Bata Industrials for inspection. If found defective the footwear will either be repaired and returned where possible, otherwise a replacement pair will be provided by Bata Industrials.

# OUTSOLE SELECTOR GUIDE

It is crucial to select the right shoe sole for the right working environment. This depends greatly on the working surface, the amount of surface pollution in the work area and the tasks the worker has to perform. That's why Bata Industrials has developed several purpose made types of outer soles, each with its own profile.

## HELIX

---

- > Dual density PU / TPU sole & PU / Rubber
- > Heat resistant to 130°C (Rubber heat resistant to 300°C)
- > Lightweight
- > Slip resistant tread for maximum grip

# BATA INDUSTRIALS FITTING GUIDE

The foundation for a good fitting work shoe is the perfect shoe shape or 'last'. Yet, our research shows us that feet are getting wider with each generation. With that in mind Bata Industrials uses a 'last' design with extra space around the front and instep for greater stability and comfort. We also provide an extensive range of length sizes.

## INSTRUCTIONS FOR USE:

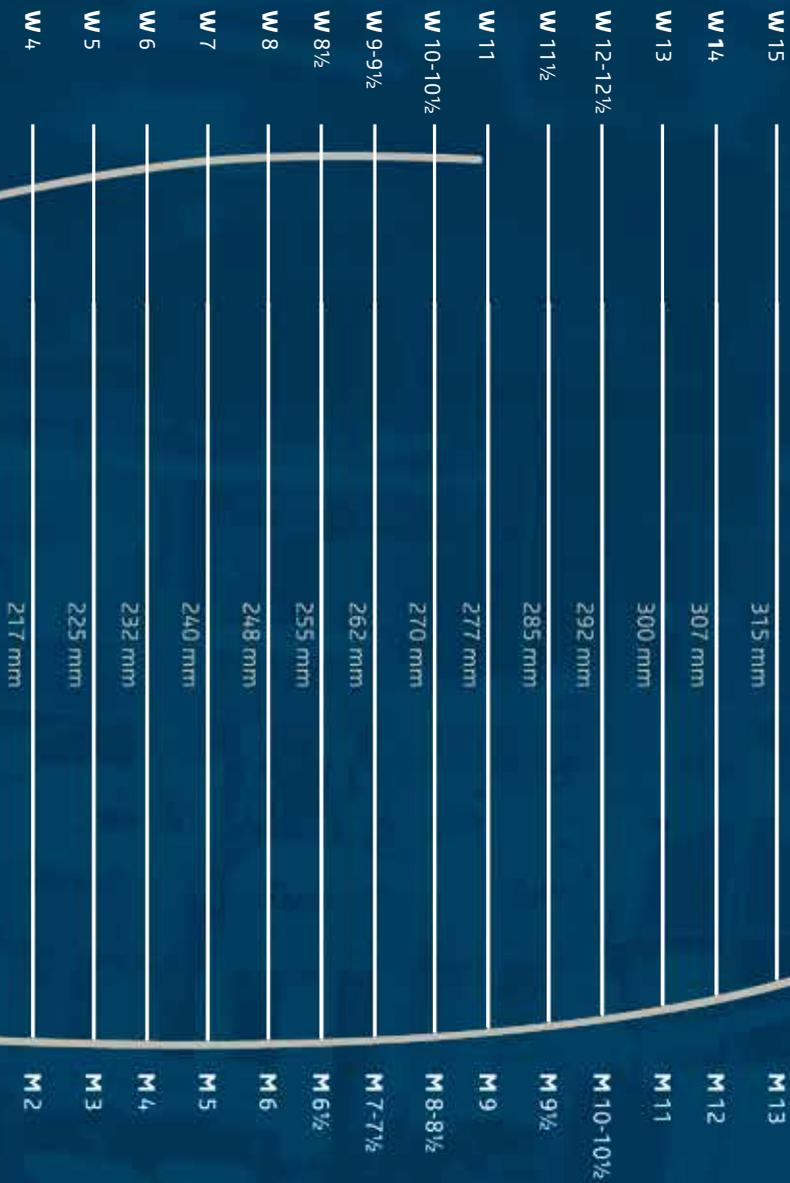

To determine your correct size,

Place your heel on the chart where indicated and measure to the end of the longest toe. If the toe is between numbers, choose the larger size.

For sizes 7/7½, 8/8½ & 10/10½.

Select 7½, 8½ & 10½, for a wider fitting or sizes 7,8 or 10 for a standard fitting.

This Men's fitting chart is to be used as a guide, the printed scale may distort due to the fold in the catalogue. Please check the length of your foot in mm and use the scale to determine your UK / Australian size.

Mondo Point	217	225	232	240	247	255	262	270	277	285	292	300	307	317	322

# SPORTMATES

With sports styling and lightness under foot SportMates® are ideal for workers on the go. A soft cushioned midsole generates outstanding comfort and flexibility whilst also providing high level impact absorption. Suede leather and mesh uppers are padded at the collar and tongue. Coupled with breathable linings this creates optimum climate control inside the shoe for day long comfort.

Light on the foot thanks to soft cushioned midsoles, SportsMates® still provide the reassuring protection of steel toe caps and durable rubber outsoles. High energy absorption and flexibility means that SportsMates® are perfect for workers on the go. Approved to Australian & New Zealand Standards AS/NZS 2210.3 the Sportsmate sole features reassuring strength and durable heat, oil and acid resistant rubber outsoles.

# NATURALS

The robust characteristics of the Natural collection now feature in an extended product range that is suitable for most working conditions. Integral to the collection, the 'Natural' sole design has been developed to be a natural extension of the body with a broad stable footbed and comfortable toe shape. Retaining Bata Industrials unique Tunnel System® in the heel the 'Natural' sole design also features cushioned dual density polyurethane soles on the outside and PU cushioned insoles on the inside. Surety and comfort under foot are fully optimized in the new Natural collection from Bata Industrials.

Bata Industrials Natural collection has evolved from years of experience servicing Australian industry and have become synonymous with a wide variety of Australian workplaces.

# NATURALS

## ZIP SIDED SAFETY BOOTS

The Naturals collection has been expanded to include new zip sided boots. Robust and durable, Naturals feature Bata Industrial's unique Tunnel System® in the heel for shock absorption and energy return. Outstanding under foot comfort is enhanced through cushioned dual density PU soles and comfort PU insoles. Known and trusted by Australian industry, and now featuring quick and easy fastening, there has never been a better time to zip in to your nearest supplier for a pair of Naturals.

## NATURALS WITH TUNNEL SYSTEM SOLE DESIGN

All the Bata Naturals range come packed with features including the Tunnel System® sole design. It features multi directional slip resistant sole pattern, channelling for improved liquid dispersal, heavier density PU outsole for durability, lighter density PU midsole for cushioning, added grip at toe off, defined heel strike for ladder use, tunnel system for energy return, added grip at heel strike, oil & acid resistant sole and heat resistant to 130°C.

**Extra Features:**

# DEEP COMFORT

Deep Comfort's mushroom lamella sole design is the most effective means of increasing the ratio of surface area to mass, increasing your overall comfort due to increased impact dispersal. In addition to the Comfort Technology System®, the Deep Comfort range uses the latest technology in raw materials, design and production processes. All Deep Comfort styles use premium full grain or nubuck leather uppers. The upper designs are such to maximize both comfort and durability.

The Deep Comfort's new sole design reflects the lamella and the CTS absorption zones. The benefits can be seen with the expansion of the mushroom shaped interior button, through to the spread of the lamella zones on the distinct sole. These impact zones provide you with a more comfortable work boot that will aid and protect your feet, legs and lower back. This unique idea delivers the wearer ultimate in comfort technology and protection. With such a simple design concept Deep Comfort is now pioneering these techniques and offering them in the form of our latest range of safety boots.

# BICKZ®

Anyone who thinks that style, comfort and safety don't go together really should find out more about Bata Industrials Bickz® safety shoes. Bickz® is a technology based product that uses the latest in composite materials to provide outstanding protection for your feet. Light in weight and fully flexible, Bickz® performs comfortably in industrial and professional environments. Functionality, safety and design truly meet as one in the new Bickz® collection from Bata.

## METAL FREE SAFETY

The Bickz® range includes a flexible Wellmax composite midsole. Just like a steel midsole this composite midsole protects the entire base of the foot against sharp objects penetrating through the sole. The range incorporates composite safety toe caps protection in accordance with AS/NZS 2210.3 safety standards making them ideal for travelling through airport security.

# PROFESSIONAL COLLECTION

Through Extensive Research and Development, we have developed a specialist range of footwear, to provide all day comfort and support to people who spend long extended periods of time on their feet. This range has literally been developed from the ground up, starting with its "HIGH TRACTION" outsole design. The sole has been developed to give the wearer extreme comfort, whilst maintaining the high levels of durability expected from a Bata Industrial product. The outsole is made from especially formulated rubber compound, which provides the usual resistance to oil and acid, 300°C heat resistance, but through its unique tread pattern increases the AS/NZS 2210.5 slip resistant level to more than the standard guaranteed. As this range is part of the Bata Industrials collection, we have added the patented impact absorbing Tunnel System for COMFORT, DURABILITY & STABILITY.

## PROFESSIONAL COLLECTION FEATURES & BENEFITS

1. Padded collar for comfort
2. Microban treated leather lining and insole
3. Full grain cowhide leather upper
4. Thermo plastic heel counter
5. Thermo plastic toe puff
6. Tunnel System® Impact Zone
7. Polyurethane Cushion Midsole
8. Molded PU footbed with arch support - removable orthotics
9. Rubber outsole - oil resistant
10. Slip resistant sole as AS/NZ 2210.3 safety standard
11. 300°C heat resistant

## **“ARE YOU AWARE, THAT WORKPLACE INJURY BY SLIPPING OR TRIPPING, IS SECOND TO ONLY THAT OF LIFTING”**

The Ladies Professional Collection has four styles tailored towards style focused women in the workforce.

Anchor has a contemporary Mary Jane style upper. The vamp strap is fastened with elastic to allow for easy use fitting and removal. Reinforced quarters provide lateral foot stability. Endurance has a contemporary styled upper, with side zip for easy fitting and elasticized entry point to allow wearers with higher insteps increased comfort. Grapple has a contemporary athletic styled upper, 5 eyelet tie with extended entry point to allow for easy and secure fitting. Grasp is a traditionally styled slip on upper. Easy fitting and removal with a generous comfortable fit.

The Professional Collection is completely “Metal Free” so is a great choice for people in the security industry or frequent flyers who need to regularly pass through metal detection units, and don’t want the inconvenience of having to remove their shoes.

# ACCESSORIES

Bata Industrials also offer a range of quality work boot accessories to help you get the most out of your safety footwear. Including water resistant sock protectors that can prevent debris from entering your boots.

Bata Industrials new crew style works socks are lightweight, comfortable, breathable and stylish. Designed to protect and cushion your feet in rugged terrain this sock can be comfortably worn for extended work days. With a compression fit at the midfoot and cuff ensures stability and helps keep cushioning in place. The unique style and shape of the work sock provides you with the additional technical support necessary to protect your feet from the pounding and friction they take on the jobsite.

Our range of insoles can make your working day a whole lot better, providing extra comfort and support where you need it most- your feet. If you spend long hours on your feet, work on hard surfaces, or are just big on comfort, a pair of insoles will help prevent fatigue and injury at work. Bata Industrial's insoles are designed to accommodate a broad industrial boot and provide maximum support and comfort.
