BLOOM

Our new Bloom foam insoles are made from a sustainable algae-based material that helps to remove harmful algae and reverse the effects of water pollution and rising global temperatures by restoring healthy ecosystems and generating clean water.

The Bloom insole provides a sustainable alternative to non-renewable petroleum-based foams. So with one insole, we are cleaning 7 litres of water and 4 cubic metres of air.

7

Litres of clean water returned to the habitat

4

M³ of air cleaned
