BOOT FEATURES

Steel Toe Cap
Capable of resisting a drop force of 200 joules to offer premium protection for your toes.

Slip Resistant
Designed to meet the slip resistance for standard AS 2210.3:2019.

Electric Hazard Protection
Designed to significantly minimise the flow electricity to the ground, reducing the possibility of electrocution.

Premium Comfort Footbed
For increased underfoot comfort and cushioning performance.

Armour Layer Anti-Penetration
Super lightweight non-metal midsole that protects the foot against sharp objects penetrating through the sole.

Reinforced for Impact Protection
Advanced technology for maximum impact protection against the Metatarsal and reinforced Heel, Shaft and Side Wall for increased ankle support.

Water Proof
100% Waterproof to keep your feet dry and comfortable in damp and wet conditions.

Fuel & Oil Resistant
Designed to meet the fuel & oil resistance for standard AS 2210.3:2019.

AUSTRALIAN MADE

REUSE. RECYCLE. REMAKE.

It's our commitment to the community to provide products that families can feel good about wearing. From Australian made production to our recycling program, we're doing everything we can to reduce our carbon footprint.

WHAT IS THE PVC RECYCLE PROGRAM?

The PVC Recycle program is an initiative of the Bata Shoe Company of Australia to reduce the amount of worn PVC gumboots being disposed of into landfill. Bata's aim is to re-process this waste into the raw materials to create brand new Bata PVC gumboots and help save the planet. Our main objective is to have zero used/worn PVC gumboots being disposed into landfill. To help our customers responsibly dispose of their used boots we are working to establish recycle disposal bins nation wide in collaboration with our distributors.
